

# CS 4322 Mobile Software Development

## Project Proposal Presentation

### Requirements:

You need clearly mention the following components in your proposal presentation:

1. **Title:** This includes the title of your project, group members, roles and responsibilities.
2. **Statement of the problem:** What are you going to do? Why are you trying to this problem? The new features provided by your app, etc.
3. **Mobile Features:** List all mobile features you plan to implement. At least three features must be integrated into basic & expected functionality sets.
4. **Functionality Overview:** **MUST show mock-up screens** and clearly divided them into the following categories:
  - a. Basic functionality
  - b. Expected functionality
  - c. Bonus functionality
5. **Others:** Mention APIs, database, any additional details related to your project
6. **Project Schedule:** A weekly-based schedule with each team member's tasks would be really nice

### Submitting Assignment:

Submit your slides through **Desire2Learn** using the appropriate link.
